LEDDEN'S Holland-Grown Bulbs for a Beautiful Spring Garden

PLANTING INSTRUCTIONS WITH EACH ORDER

TULIPS—Top Size

Tulips are the most spectacular of all spring-flowering bulbs, coming at the height of the season when flowering shrubs and trees add to the picture. They are extremely easy to grow. Plant them in the fall, 5 inches deep.

Our bulbs are imported from Holland. All are top size and the very first quality. We offer a selected list of the most popular varieties, chosen to give a good range of color and type.

NARCISSUS

The first Narcissus to appear in the spring garden are like a burst of welcome sunshine. Their tones of yellow, from the softest ivory to vivid gold and orange, are warm and cheerful. Like tulips, Narcissus are best planted in groups rather than in sparse rows. They combine well with the smaller spring bulbs, with

shrubs or evergreens as a background. Plant them early in the fall, 4 to 5 inches deep. The bulbs may be left undisturbed for three or four years; then lift them after the foliage dies down, store over summer and replant in the fall.
